OUR STORY

Dedicated to creating beautiful luxury cabinet hardware for nearly a century, we believe in exceptional design and exquisite detail, in celebrating true craftsmanship and in the art of using the finest materials to form products that truly stand the test of time.

Now a fourth-generation family business, our expertise has been thoughtfully passed down from generation to generation and we are proud to be favoured by architects, interior designers and property developers the world over.

Brass has a rich history with the application of the material used to protect and decorate through the ages. The material is timeless, luxurious and above all, the beauty of brass lies in the vast array of finishes that can transform each product.

From initial design sketches to masterfully hand-finishing every single piece of hardware, we oversee each phase of production in the heart of England at our Birmingham factory.

Our products can be found in some of the world's finest homes, hotels and spaces – something that continues to drive our commitment to excellence.

BESPOKE

At Armac Martin, we understand that sometimes, you may require a piece or indeed a collection specially made for your interior design project and so we're proud to offer both full and partial bespoke design and manufacturing services. With nearing a century of experience, let our skilled team impeccably transform your ideas into the perfect brass fixtures and fittings for when you simply need something one of a kind.

THE DETAILS

We are delighted to invite each of our bespoke clients to visit us at our Birmingham factory where we can help to inspire your designs and you can experience the manufacturing process in person. Our bespoke service includes:

CAD	3D rendering and technical drawings so you can clearly visualise your hardware
3D PRINTING	3D printing from our prompt prototyping machine to produce a prototype that you can see and feel to experience the design and proportions
ENGRAVING	Laser engraving to subtly add your own branding on a wide array of bespoke products and our core collections
SUPPORT	Expert technical sales support so you have a personal contact throughout

FULLY BESPOKE

No matter what form your design ideas are in, work with our dedicated team to create a completely bespoke product. From size and style to branded engraving, we'll create 3D designs so you can experience how the finished hardware will look and feel to ensure it fits with your project, before creating final technical drawings for you to sign off before production begins.

Lead times are primarily between 8 - 12 weeks for this service.

PARTIALLY BESPOKE

Our partially bespoke service is perfect for when you've found the hardware pieces you need from one of our core collections, yet the measurements aren't quite right for your design. We can customise the length, diameter and projection for you so that the hardware fits perfectly to your project.

Lead times are primarily between 6 - 8 weeks for this service.

Bespoke inset handles in our burnished brass finish

OUR FINISHES

We truly believe that luxury is in the detail and so we take great pride in offering our customers over 20 beautiful signature finishes to ensure your hardware has the look and feel you desire. Each of our luxury cabinet hardware products and accessories are made from the finest solid brass and we apply an array of plated and patinated finishes to create an exquisite look for each - many of which are hand-finished by our team of expert polishers in the heart of Birmingham.

PBL - Polished brass lacquered

The product is hand-polished to achieve a smooth mirrored finish. A highly durable clear gloss lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidation.

PBUL - Polished brass unlacquered

The product is hand polished to a smooth mirrored finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

To help maintain and preserve the finish it is recommended that you use a good quality metal polish as required.

SBL - Satin brass lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear gloss lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidation.

SBUL - Satin brass unlacquered

The product is hand sateened to give a brushed satin finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

SBSL - Satin brass satin lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear satin lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidation.

HBB - Hand burnished brass

The product is hand polished to a smooth mirrored brass finish. The finisher then hand burnishes the product to achieve a natural looking aged appearance.

The hand burnished brass finish is not lacquered and as a result, is classed as a living finish which will oxidise over time.

ABL - Antique brass lacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

Finally, a highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

ABUL - Antique brass unlacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

As this is a natural living finish the finish will naturally oxidise and patina over time. The more the product is handled the faster the finish will wear away, eventually leading to a more natural brass appearance.

BEL - Burnished brass

The product is hand sateened to give a brushed satin finish. A light antique patina is then applied to the brass before being placed into barrelling machines full of cones. This is in order to achieve a naturally aged appearance to the product.

ACP - Antique copper plate lacquered

The product is hand sateened to give a brushed satin finish. A copper plate is then applied on top of the brass. The polisher then relieves the finish to give an antique copper finish.

Finally, a highly durable clear satin lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

MBL - Matt black lacquered

The product is hand sateened before it is shot blasted to give the metal the desired textured matt finish.

Finally, a highly durable matt black coloured lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

MWL - Matt white lacquered

The product is hand sateened before it is shot blasted to give the metal the desired textured matt finish.

Finally, a highly durable matt white coloured lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

SAS - Satin antique satin lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, a highly durable clear satin lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

SAL - Satin antique gloss lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, a highly durable clear gloss lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

AMB - American bronze lacquered

The product is hand sateened to give a brushed satin finish. A bronzing powder is then evenly applied to the brass before being relieved to give a smooth consistent finish.

Finally, a highly durable clear gloss lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

CBP - Chocolate bronze lacquered

The product is hand sateened to give a brushed satin finish. A bright copper plate is then applied. A bronzing powder is then evenly applied to the copper before being relieved to give a smooth consistent finish with a copper undertone through the bronze.

Finally, a highly durable clear satin lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

ASP - Antique silver plate lacquered

The product is hand sateened to give a brushed satin finish. A silver plate is then applied before a bronzing powder is applied on top of the silver. The finish is then relieved to give an antique silver finish.

Finally, a highly durable clear satin lacquer is then applied and cured in our ovens to ensure lasting protection. This hard and durable layer will protect the finish from day-to-day usage and oxidisation.

PNP - Polished nickel plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

PCP - Polished chrome plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

SNP – Satin nickel plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

SCP – Satin chrome plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

NBP – Barrelled nickel plate

The product is hand sateened to give a brushed satin finish. The product is then lightly distressed. Finally, a dull nickel plate is applied to the product.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

HBN – Hand burnished nickel

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied. The finisher then hand burnishes the product to achieve a natural looking aged appearance.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

OUR COLLECTIONS

Designed to enhance your interior cabinetry and make every detail one to take note of, each of our luxury solid brass collections is thoughtfully designed in-house. Producing the finest fixtures and fittings in an array of covetable styles, our collections promise to cater for every interior look imaginable. From minimal and modern to those inspired by times gone by like the art-deco era, discover over 35 exquisite collections to adorn your cabinets.

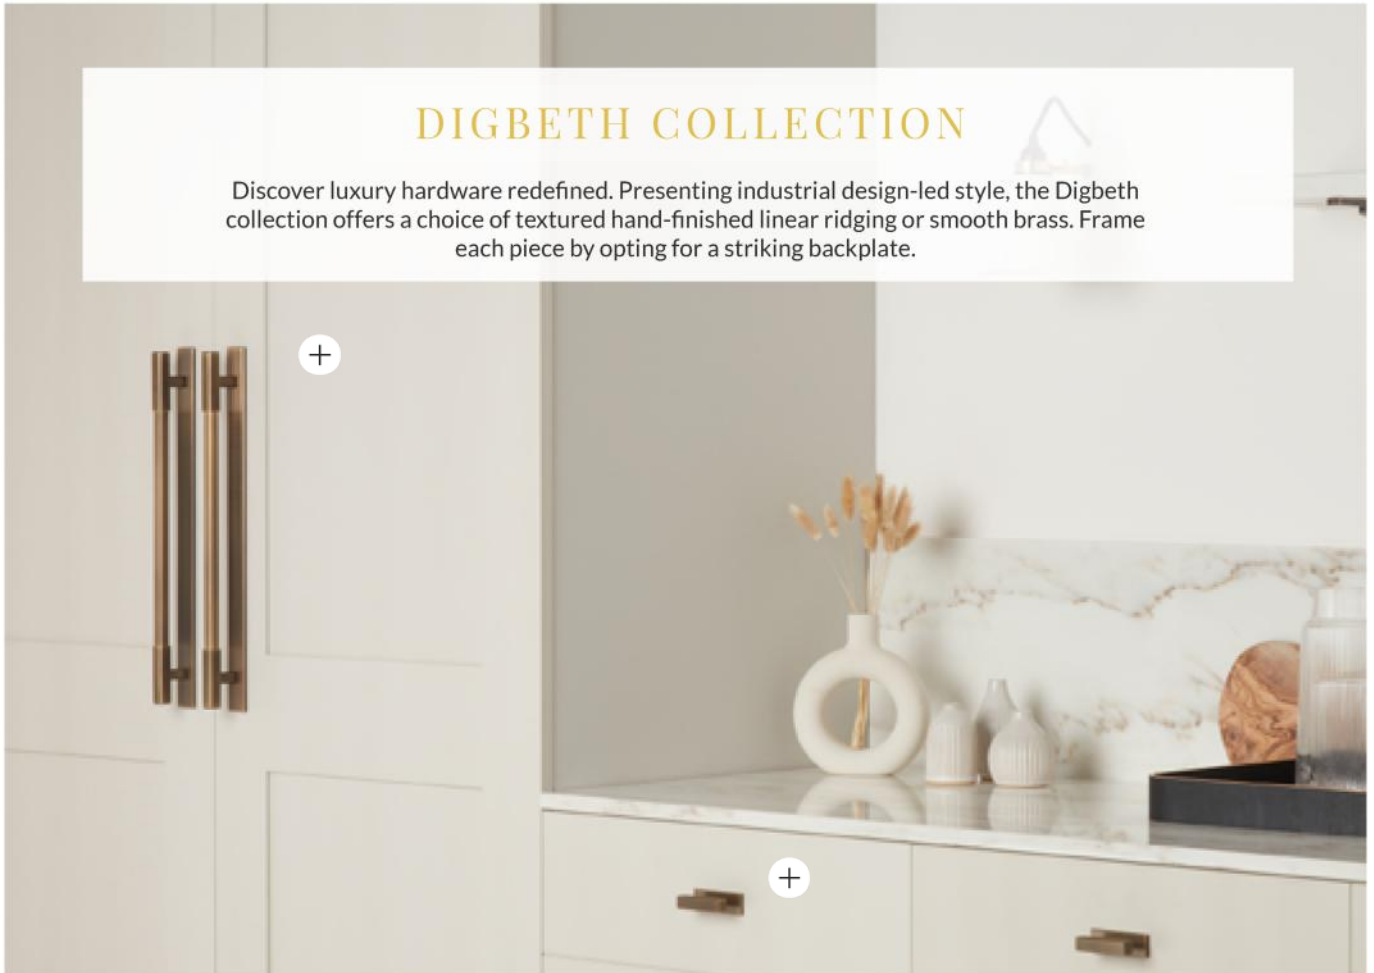

MIX Diamond Appliance Handle with backplate, Edgbaston Pull, Regency Diamond Grille, Sparkbrook Handle, MIX Diamond Knob with backplate in our satin brass unlacquered finish

DIGBETH COLLECTION

Discover luxury hardware redefined. Presenting industrial design-led style, the Digbeth collection offers a choice of textured hand-finished linear ridging or smooth brass. Frame each piece by opting for a striking backplate.

THE CLAREMONT COLLECTION

Designed by eminent interior designer Sophie Paterson, The Claremont Collection is a debut range of desirable luxury brass mirrors, featuring three impeccably crafted mirrors in a timeless satin antique satin lacquered finish. Each mirror promises to bring pure sophistication to bedrooms and dressing rooms alike.

'Together we wanted to create a range that would work in any interior from classic to contemporary, with a timeless design that would be equally functional and beautiful.'

- Sophie Paterson

DECORATIVE GRILLES

Handcrafted in the heart of England, our decorative grilles bring an ornate elegance to cabinets, panels, doors, vents or radiator covers. Assembled by hand and precisely trimmed to fit your required aperture, our solid brass grilles are designed to showcase a perfectly symmetrical pattern. No matter your decor, discover the perfect style to complement your design concept.

Regency Diamond Grille in our satin brass finish with coarse mesh backing and Bromford Handle in our burnished brass finish

GRILLE FINISHES

Our expertly crafted luxury brass grilles come in ten beautiful finishes.

These can be applied to all brass grilles, however are not suited to stainless steel or aluminium.

Please note, antique brass and bronze metal antique finishes can vary slightly from order to order as these are hand-finished. Antique brass, antique copper, bronze metal antique and antique silver are lacquered and it is not an option to have it removed.

Please turn to page 124 for details on how to order your grille

Lincoln Cabinet Knob in our satin antique satin lacquered finish & Regency Diamond Grille in our antique brass lacquered finish

MIXED FINISH

- Grilles without rosettes can only be satin brass and satin brass lacquered but with a backing mesh in any other finish
- Grilles with alternate rosettes can be mixed with two finishes (excluding BMA). The grille is one finish and the mesh and rosettes a different finish
- Grilles with Rosettes on all joins cannot be offered in a mixed finish

CUT PINS

(The pins used to assemble the grilles are clipped at the back and hammered over to create a cleaner look)

- They are only offered when grilles have no mesh backing
- They cannot be offered on grilles with polished nickel, polished chrome or BMA

Please turn to page 124 for details on how to order your grille

ELLIPTICAL GRILLES

Our Elliptical Pattern Grilles add a truly sophisticated look to cabinet doors, radiator covers and more. Handcrafted from solid brass and made to fit into your required aperture, they come ready to fit.

ORIENTATION OPTIONS

The ellipses will stretch to match either the height or width of your required measurements as indicated by the orientation below.

Please note, the longer measurement of your required panel needs to run in alignment with the stacked ellipses to achieve the desired look. For example, the height of the vertical grilles should be longer than the width

Horizontal

Vertical

- Both available in Brass and Stainless Steel
- Finishes available on Brass material only

FINISH OPTIONS

To see our ten grille finishes in full, please turn to page 102.

HOW TO ORDER YOUR GRILLE

To place an order for a decorative grille, please email sales@armacmatin.co.uk with your enquiry.

Use the guide below to help provide as much information as possible.

REQUIRED FOR ALL GRILLES

- Supply and identify the height and width of your panel. This should be the actual size you require, including the rebate of your door. Please allow 1.6mm all around to allow the grille to fit in your rebate comfortably
- Note the finish required
- Note if you require a metal frame

ADDITIONAL DETAILS

Regency Diamond and Georgian Square

- Advise if backing mesh is required and specify G213 or G214 (see page 123)
- Advise if rosettes are required and if on every intersection or on alternate intersections
- Advise if you require roses, pinheads or both and the type of rosette required

Elliptical grilles

- Note which way you require the ellipses to run - horizontally or vertically (as pictured on page 106)
- Advise if backing mesh is required and specify G213 or G214 (see page 123)
- Advise if rosettes are required and if so which style

Interwoven grilles

- Note if you require a diamond, square or rectangular pattern
- Note the aperture size required
- Note if you'd like plain or reeded section and the size required
- Advise if backing mesh is required and specify G213 or G214 (see page 123)

Frames

- Note the type and size of frame required
- Supply the aperture (hole size) or overall size (including frame)
- Advise if screw holes are required in the frame for fixing

Regency Diamond Grille in our antique brass lacquered finish and Bakes Pull & Cotswold Cupboard Latch in satin antique lacquered finish
